

50 Hours Stranded In a Plastic Wrap Tent

LEGEND:

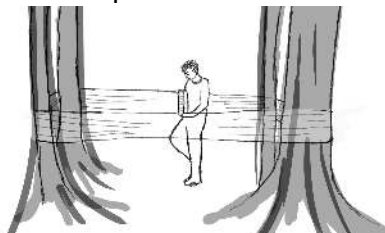

Short Hook

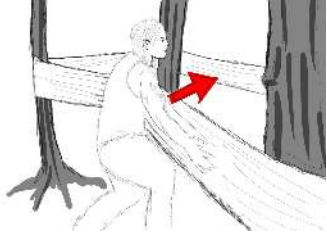

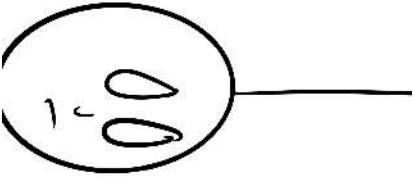

Comment

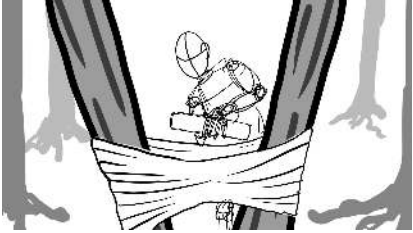

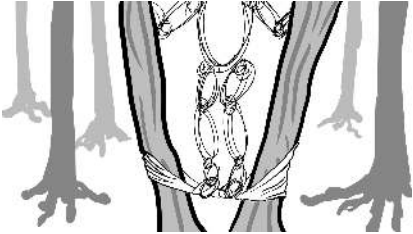

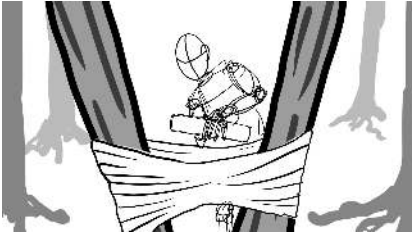

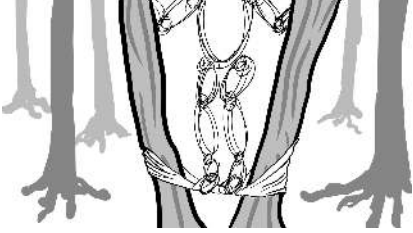

Voiceover

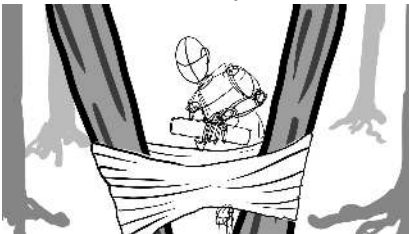

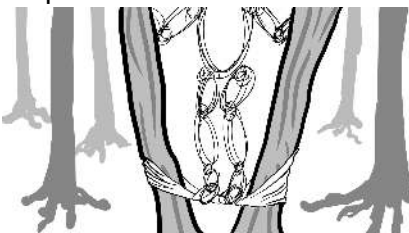

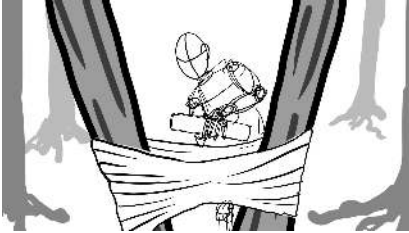

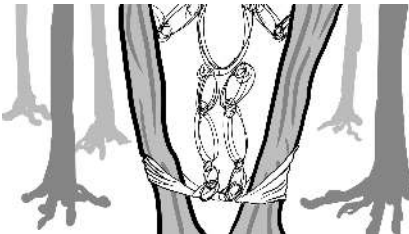

#	AUDIO	VISUAL
	I'm stranded in the middle of nowhere with only plastic wrap.	Ethan stands center screen, wide shot of him stranded in the forest holding one roll of Plastic Wrap, drone zoom out to reveal forest  
	I'm not scared, you are.	Static shot, ethan stands there awkwardly 

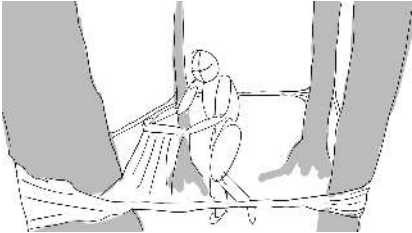

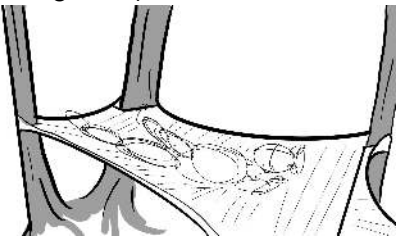

#	AUDIO	VISUAL
	I'm spending the next 50 hours using only plastic to see If I have what it takes to survive in the wild.	Foreshadow plastic tent, survival hacks, struggles 
	I have no idea what I'm doing.	ethan stands there awkwardly 
	50 Hours Starts now, so I need to build a base before it gets dark.I've found the Best Viral Survival Hacks that I'm going to put to the test.	Show viral survival videos, (record static shot of talking to camera) 
	First, <u>I'm going to attempt to build this viral Plastic Wrap Tent from scratch.</u>	Show thumbnails of viral plastic wrap videos next to ethan 

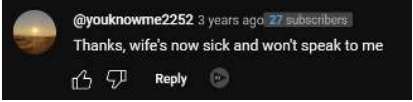

#	AUDIO	VISUAL
	So, I need to wrap it around these 4 trees	Ethan stands there like hes about to start wrapping the tree (same framing as the viral video) But he begins to struggle to get the first layer of plastic wrap.
	UGH, You know, in survival shows, they don't show you the real struggle, like trying to peel the start of the plastic wrap.	Zooms in to Ethan struggling to peel the first layer of plastic wrap.
	Maybe the comments can help me	Static shot, ethan talks to camera 
	"You would absolutely cook inside there."	Show comment full screen
	"A bear would tear that thing apart"	Show comment full screen
	"не пытайтесь этого, вы умрете. Я пытался и чуть не задохнулся"	Show comment full screen
	Now we gotta wrap the plastic wrap around 4 trees	Speed up footage like the viral hack, match angle and wrap plastic wrap around trees 
	Thanks, I have no idea what that means. Well, that wasn't helpful at all...	Ethan talks to camera 

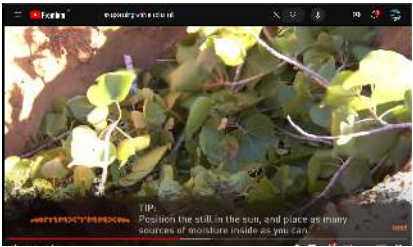

#	AUDIO	VISUAL
	Now I just have to run into it to make sure it holds my body weight...	*Ethan runs into the plastic wrap and falls through*  (use only a small amount of layers so you don't waste too much and so you can fall through.
	It doesn't.	Ethan laying on ground after fall (continuation of previous shot) 
	Well, this is a perfect time to test:	Close up, Ethan is lying on the floor talking to the camera. 
	How many layers of plastic wrap does it take to hold a human?	Standing behind pyramid of plastic wrap  Viral examples pop up on screen.

#	AUDIO	VISUAL
	Let's try 10 layers	(this section will be between two smaller trees so we can use less plastic wrap) Ethan wraps 10 layers  Ethan stands on layers, it snaps. Text "10 Layers" turns red when it snaps 
	20 layers! *after snaps* "this isn't going well..	Ethan wraps 10 layers  Ethan stands on layers, it snaps.  Text "20 Layers" turns red when it snaps

#	AUDIO	VISUAL
	FIFTY LAYERS? Surely this can hold my weight... right?	Ethan wraps 50 layers  Ethan stands on layers, it snaps.  Text "50 Layers" turns red when it snaps
	ONE HUNDRED LAYERS... I'm almost out of plastic wrap, so this better work.	Ethan wraps 100 layers  Ethan jumps on layers, it snaps.  Text "100 Layers" turns red when it snaps

#	AUDIO	VISUAL
	Okay, I think this is like 200-300 layers, I don't even know anymore, I've lost track..	(move to the 4 trees that you will actually be using to build the shelter)  Static shot. In this part, you're actually building the shelter, take your time and follow the tutorial to make the bottom layer. Ethan lays down on the layers, it holds his weight.
	Here we go, I might just sleep here for the night. Not too shabby!	(this line is only for the end of the short and will not be used in long form)  Ethan is comfortable laying on the Plastic Wrap layers.
	after a questionable amount of plastic – and questioning my life choices – we've got what I'm gonna call home for the next ___ hours. Anyways, I'm starting to get thirsty.	Ethan looks exhausted and speaks to the camera. 

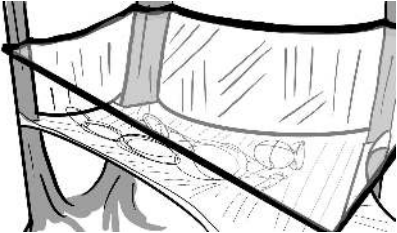

#	AUDIO	VISUAL
	So, Can I make dirty water drinkable using only plastic?	
	First, dig a hole in the dirt.	
	I don't have a shovel... or do I?	 Ethan slowly raises his hand in a 'shovel' or 'cup' shape as he says "or do I?"
	digging sounds	
	This is a lot more work than I expected, let's see what the comments give me any hope.	
	"Thanks, wife's now sick and won't speak to me"	

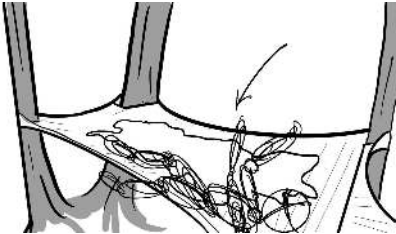

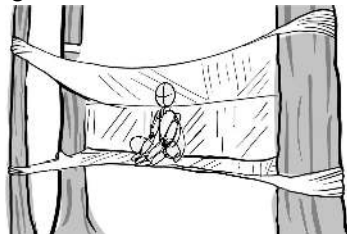

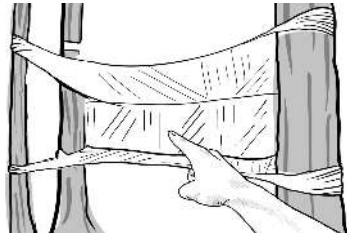

#	AUDIO	VISUAL
	All you need is a shovel, a conveniently large plastic sheet and 10 hours of your spare time!	 A YouTube video thumbnail from user @fawadiaz7318, posted 1 year ago. The text on the thumbnail reads: "all you need is a shovel, a conveniently large plastic sheet and 10 hours of your spare time!". It shows a person in a desert-like environment.
	👍 (thumbs up)	 A YouTube video thumbnail from user @theobserver450, posted 1 year ago. It shows a person in a desert-like environment.
	Is that 'thumbs up' good or bad??! This better work.	 A black and white sketch of a person's face, looking thoughtful or concerned.
	Now we have to fill this hole with green plants.	 A close-up shot of green plants growing in a hole. A text overlay at the bottom reads: "TIP: Position the still in the sun, and place as many sources of moisture inside as you can."
	Just like this	Ethan fills the hole with green plants
	And then wet your pants- I mean, plants'	 A person in a desert setting, kneeling and working with a large plastic sheet.
	place half a water bottle in the center where all the water should go.	 A close-up shot of a hand placing a white cup into a hole filled with green plants.

#	AUDIO	VISUAL
	Now, I have NO IDEA how you're supposed to find a giant plastic sheet in the middle of the forest - oh.	
	Here's a giant plastic sheet in the middle of the forest. Funny how mother nature works, huh?	
	Okay let's put the plastic over the hole and cover the edges with dirt so it doesn't move.	
	Let's hope nobody finds me right now because they might think I'm hiding a body.	
	Then put the rock in the center. Let's call him Dwayne.	Place a rock in the centre instead of dirt. 
	So, condensation should build up and then trickle down the plastic into the bottle at the bottom.	

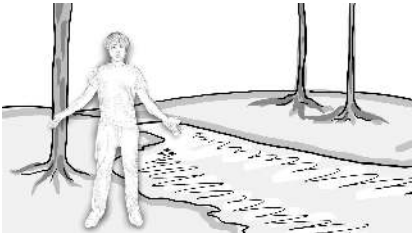

#	AUDIO	VISUAL
	While we wait, let's finish the base.	
	For the roof, let's just repeat what we did for the floor but... higher.	Speed up to match the viral video, shot for shot looks the same but faster. 
	Wow! This is looking... pretty not bad I guess!	Ethan looks at the half-built tent knowing it's not great but better than expected. 
	Now I just gotta build the walls!	Ethan talks to camera 

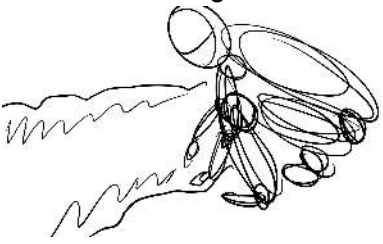

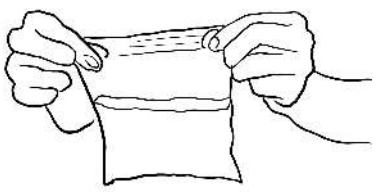

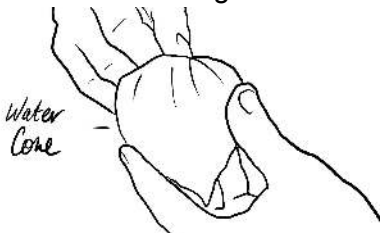

#	AUDIO	VISUAL
	I just realized she made the walls ONE LAYER THICK... I guess I gotta do the same.	Arrow pointing to thin walls on viral video, then cuts to Ethan talking to camera. 
	Let's hope that the comment about the bears is false.	Ethan stops halfway through wrapping the walls, worried about the structural integrity. 
	bear growls	CGI Bear appears from the bushes and eats Ethan 
	And boom! Welcome to my humble abode.. *awkward laugh*	Ethan stands out the front of the Plastic wrap tent revealing the full thing for the first time. 

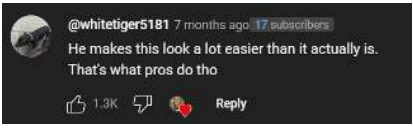

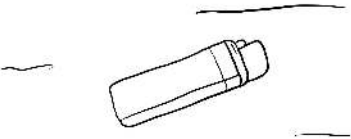

#	AUDIO	VISUAL
	Let's RATE IT	Ethan leans into the camera 
	Simplicity: I mean, it's all just plastic. No rope, no glue, no nothing. I guess it does exactly what I need - nothing. But, it did take me ____ hours to build so, I'd give it 7/10 for simplicity	B-roll shots of a plastic wrap tent, showing details.  wide shot of Ethan laying in tent when he says "nothing"  Record full shot of talking to camera too.

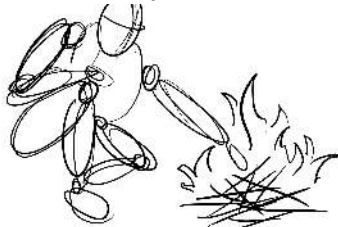

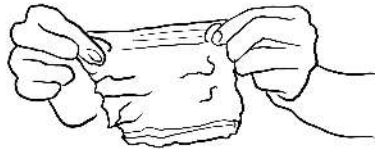

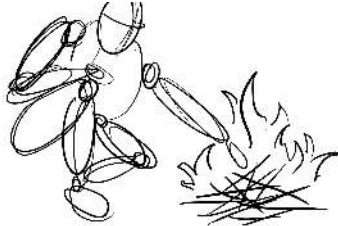

#	AUDIO	VISUAL
	Safety - well, this is basically a ticking time bomb. I have no idea when I might just fall straight through the floor, and the walls are basically a display cabinet for predators so, I've gotta give it a solid 4/10 for safety.	VFX Shot of ethan falling through  Then a wide shot of Ethan sitting in a tent full frame. 
	But STYLE? - Well, it ain't MTV Cries. But It is like living in a fish bowl and I've always wanted to be a fish.	Ethan points to tent  Tent turns into fish bowl VFX  Ethan morphs into badly photoshopped fish. 

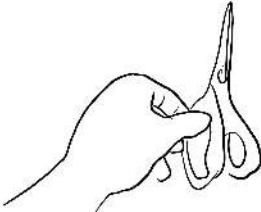

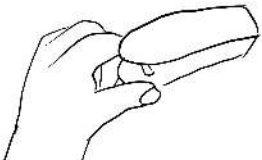

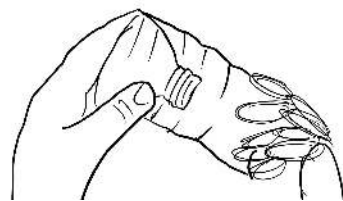

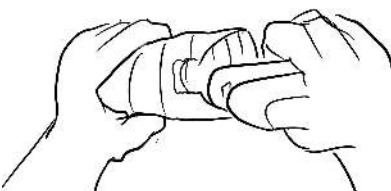

#	AUDIO	VISUAL
	It's getting cold so it's time to test the second survival hack!	Ethan sits on the floor center frame, there's a blank spot in front of him where a fire will go 
	Can I start a fire using only a Plastic Sandwich Bag?	
	If a guy that hasn't changed his hairstyle in 50 years gives you survival advice, take it and cherish it.	Show comment full screen
	Looks like Frank Gallagher really got his stuff together!	Show comment full screen
	"I can start a fire with a bag of water" that should win you some bets	Show comment full screen
	Well, at least If YouTube doesn't work out, this could be my next side hustle.	
	Now, stick with me here - I have to fill this bag with water, but in order to fill it with water, I need to find water.	

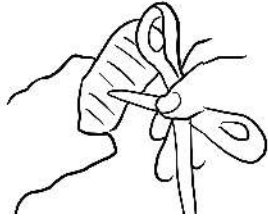

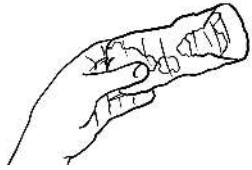

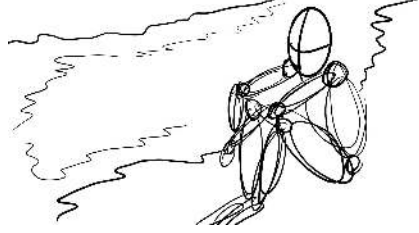

#	AUDIO	VISUAL
	IT'S "WATER TIME"	(epic "WATER TIME" Title card appears)  Ethan stands epicly awkward.
	sound of shoes tied	Close up of Ethan tying his shoes. 
	I found it.	It zooms out to reveal water when he says "I found it" 

#	AUDIO	VISUAL
	Okay, so the video said to fill it up about half way like this.	Ethan leans over water and fills the sandwich bag.  (Ethan fills up bag a bit too much) 
	Then twist it into a cone shape.	Ethan twists the bag 
	Okay, maybe I shouldn't twist it that much.	Ethan twists the bag until it pops. 

#	AUDIO	VISUAL
	So, apparently this is supposed to work like a magnifying glass to create a fire. But now that it's cold, I don't know how well this is going to work out.	Ethan copies the video, trying to light his kindling and firewood. 
	@whitetiger5181 was right.. "he makes this look a lot easier than it actually is."	Ethan talks to camera, disappointed  Reads comment 
	Oh Look! a wild lighter just sitting on the ground.	

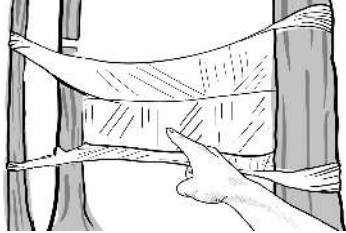

#	AUDIO	VISUAL
	Okay, come on, I tried. did you really think I was capable of starting a fire with this?	Ethan starts the fire the traditional way.  Holds up a dripping wrinkly deflated sandwich bag. 
	Now that we have a fire, we need something to eat! so,	
	<u>Can I catch a fish Using a plastic bottle?</u>	Ethan holds up a plastic bottle to screen 
	All I need is a plastic bottle	Ethan places plastic bottle on ground matching video 

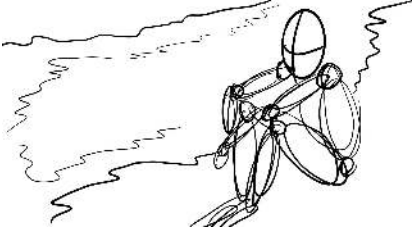

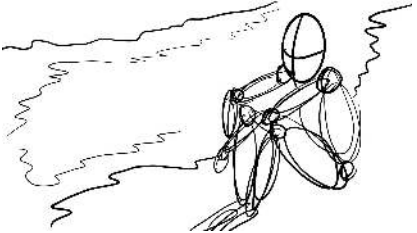

#	AUDIO	VISUAL
	A pair of scissors	Ethan places scissors on ground matching video 
	A stapler. who would have a stapler in a survival situation?? anyways..	Ethan places stapler on ground matching video 
	some bread	Ethan places bread on ground matching video 
	Then cut the top off the plastic bottle and flip it back into itself like this.	Ethan follows the viral video 
	Staple it together	Ethan follows the viral video 

#	AUDIO	VISUAL
	Stab it	Ethan follows the viral video 
	And hope it's fresh like bread.	Ethan follows the viral video 
	Spoiler alert... they didn't	Various clips of trying
	I wasted hours trying to catch a fish using this DIY trap until I realized...	Ethan waits by water 
	There are no fish in this pond.	Ethan points to water with text "no fish" 
	Well, here goes my sushi plans for the night. I guess I'm going to be surviving on bread for the remaining ____ hours.	

#	AUDIO	VISUAL
	With darkness creeping in, just like my doubts. I have __ hours left, and it's freezing.	
	So, In order to avoid becoming a literal ice cube. I need to make a blanket.	Ethan morphs into Ice Cube, the rapper when he says "Ice Cube" 

#	AUDIO	VISUAL
	I am the blanket.	Hard cuts to Ethan completely wrapped in plastic wrap. He stares into camera silently awkward, he breaks the silence with "I am the blanket"  
	Don't let the bedbugs bite? More like "Don't let the plastic suffocate you in your sleep"	Ethan awkwardly climbs into the tent with difficulty. Static wide shot (DO NOT MOVE TRIPOD)
	sounds of ethan lying down	Ethan lies down in his tent with a plastic bag pillow for comfort. Static wide shot (DO NOT MOVE TRIPOD)

#	AUDIO	VISUAL
	squeaking of ethan waking up and getting out of tent	*hard cut* same static shot of tent, its now daytime* Static wide shot (DO NOT MOVE TRIPOD) (this whole scene should have the camera in the same position, it hard cuts from night to daytime.)
	walking to camera squeaking	Ethan walks over to the camera looking exhausted.
	That was an extremely crunchy sleep.	Ethan looks tired.
	I spent the night in my plastic palace and only woke up screaming twice.	
	ETHAN SCREAMING IN THE DISTANCE	Same static shot of Ethan in the tent at night, screaming. (hard cut)
	We have ____ hours remaining and I don't want to look like leftovers in the fridge anymore.	Ethan takes off his plastic wrap suit.
	I'm about as hydrated as a raisin right now.	Ethan walks to his water still
	It's time to check on our water trap we made yesterday.	Ethan takes the water bottle from the water still
	Well, it turns out Mother Nature doesn't care about your life hacks because I've collected a total of 3 drops of water.	Ethan brings bottle up to camera
	I've named them "hope, despair, and Why-Am-I-Doing-This?"	Close up of water in a bottle.
	Fortnite Chug Jug Sound	Ethan drinks the water.

#	AUDIO	VISUAL
	Wow, that was... not a lot of water.	Ethan is now dehydrated and sad
	minecraft hurt sound	Hard cut of ethan now on the ground in a dead pose
	Well, there's only a few hours remaining and it's almost time to say goodbye to the Plastic Wrap Palace. I'm going to miss this place.	
	Over the last ____ hours I've slept with a transparent view of the stars, I've attempted survival hacks that are more likely to kill me than keep me alive and met a few friends along the way.	Montage with happy music
	My friend will be here soon to pick me up... but, you know what, I don't think I want to leave.	
	sound of walking in the background	Ethan turns around and notices his friend walking towards him to pick him up.
	Oh thank god! Get me out of this place...	Ethan notices his friend and gets up super quick and races off towards him.
	VO: Well, that's a wrap folks.
